NOTE 2: the one channel function mode can be selected through the DMX function menu. The color of the light will be a white 5600 °K.												
NOTE 3: the rest position of the +-green DMX channel is 128. Diminishing the DMX value augments the presence of the green color. Increasing the DMX value augments the presence of magenta												
NOTE 4: increasing the value of the Saturation DMX channel the white light will fade to the color selected with the Color Wheel DMX channel.
