<b>9</b>	<b>17</b>			<i>Channel not used</i>		

The **PGRP** option in the control menu for the module defines which LEDs the following 4 channels control. See "Pixel grouping" on page 13. The channels can control:

- All of the LEDs (**PGRP** set to "**ALL**"), or
- Group **A** of 2 vertically split LED groups (**PGRP** set to "**2V**" and four other channels control the opposite segment), or
- Group **A** of 2 horizontally split LED groups (**PGRP** set to "**2H**" and four other channels control the opposite segment), or
- Group **A** of 4 quadrant split LED groups (**PGRP** set to "**1**" and three groups of four other channels control the other three segments).

<b>10</b>	<b>18</b>	0 - 255	0 - 100	<b>Warm white – raw</b> CTC channel must be set to a DMX value from 0 - 19. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>11</b>	<b>19</b>			<i>Channel not used</i>		
<b>12</b>	<b>20</b>	0 - 255	0 - 100	<b>Cold white – raw</b> CTC channel must be set to a DMX value from 0 - 9. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>13</b>	<b>21</b>	0 - 19 20 - 255	0 - 7 8 - 100	<b>CTC (Color Temperature Control) – calibrated</b> No function, Warm and Cold channels (10 and 12 in CT mode/18 and 20 in CTX mode) enabled CTC 7 000 K → 3 000 K, Warm and Cold channels disabled	<b>Fade</b>	<b>0</b>

The following block of four channels is *only available and used if individual quarter or half groups of LEDs are to be controlled*. The level of control is set using the **PGRP** option in the control menu for the module. See "Pixel grouping" on page 13. When available, the channels control:

- Group **B** of 2 vertically split LED groups (**PGRP** set to "**2V**"), or
- Group **B** of 2 horizontally split LED groups (**PGRP** set to "**2H**"), or
- Group **B** of 4 quadrant split LED groups (**PGRP** set to "**1**").

<b>14</b>	<b>22</b>	0 - 255	0 - 100	<b>Warm white – raw</b> CTC channel must be set to a DMX value from 0 - 19. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>15</b>	<b>23</b>			<i>Channel not used</i>		
<b>16</b>	<b>24</b>	0 - 255	0 - 100	<b>Cold white – raw</b> CTC channel must be set to a DMX value from 0 - 9. Zero → 100%	<b>Fade</b>	<b>0</b>

**Table 5: DMX Protocol, CT Zoom module**

CT	CTX	DMX Value	Percent	Function	Snap/ fade	Default DMX value
<b>17</b>	<b>25</b>	0 - 19 20 - 255	0 - 7 8 - 100	<b>CTC (Color Temperature Control) – calibrated</b> No function, Warm and Cold channels (14 and 16 in CT mode/22 and 24 in CTX mode) enabled CTC 7 000 K → 3 000 K, Warm and Cold channels disabled	<b>Fade</b>	<b>0</b>

The following four channels *are only available and used if individual quarter groups of LEDs are to be controlled (PGRP is set to “1”).* The level of control is set using the **PGRP** option in the control menu for the module. See “Pixel grouping” on page 13. The channels control Group **C** of quadrant split LEDs.

<b>18</b>	<b>26</b>	0 - 255	0 - 100	<b>Warm white – raw</b> CTC channel must be set to a DMX value from 0 - 19. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>19</b>	<b>27</b>			<i>Channel not used</i>		
<b>20</b>	<b>28</b>	0 - 255	0 - 100	<b>Cold white – raw</b> CTC channel must be set to a DMX value from 0 - 9. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>21</b>	<b>29</b>	0 - 19 20 - 255	0 - 7 8 - 100	<b>CTC (Color Temperature Control) – calibrated</b> No function, Warm and Cold channels (18 and 20 in CT mode/26 and 28 in CTX mode) enabled CTC 7 000 K → 3 000 K, Warm and Cold channels disabled	<b>Fade</b>	<b>0</b>

The following four channels *are only available and used if individual quarter groups of LEDs are to be controlled (PGRP is set to “1”).* The level of control is set using the **PGRP** option in the control menu for the module. See “Pixel grouping” on page 13. The channels control Group **D** of quadrant split LEDs.

<b>22</b>	<b>30</b>	0 - 255	0 - 100	<b>Warm white – raw</b> CTC channel must be set to a DMX value from 0 - 19. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>23</b>	<b>31</b>			<i>Channel not used</i>		
<b>24</b>	<b>32</b>	0 - 255	0 - 100	<b>Cold white – raw</b> CTC channel must be set to a DMX value from 0 - 9. Zero → 100%	<b>Fade</b>	<b>0</b>
<b>25</b>	<b>33</b>	0 - 19 20 - 255	0 - 7 8 - 100	<b>CTC (Color Temperature Control) – calibrated</b> No function, Warm and Cold channels (22 and 24 in CT mode/30 and 32 in CTX mode) enabled CTC 7 000 K → 3 000 K, Warm and Cold channels disabled	<b>Fade</b>	<b>0</b>

**Table 5: DMX Protocol, CT Zoom module**

<sup>1</sup> If DMX Reset is disabled in the onboard control menus, a reset command can only be executed if channel 2 is set to DMX value 232 and channel 1 is set to zero.

<sup>2</sup> Menu override. Setting unaffected by power off/on

<sup>3</sup> If a CT Zoom module is fitted to the rear of the head, the pan/tilt and fixture control channels have no effect.
